Comment. From a comparison with the corresponding tabulation drawn up on 31 May 1952, it is concluded that the following numbers of repairs on locomotives were performed in June 1952:

Damage category	L0	-	48	locomotives
"	L2	-	37	"
"	L2K	-	52	"
"	L3	-	62	"
"	L4	-	28	"
"	L4G	-	8	"
"	L1	-	6	"

Category L1 covers repair work done on electric locomotives and not, as originally assumed, repair work on locomotives damaged during the war. A comparison of the figures listed in the target and actual performance columns of the present report shows that in the L0 category, which covers minor damages, the annual repair quota was fulfilled in the first half of the year and that in the L4 G category repair work proceeded on schedule. However, in all the other damage categories listed, the production of railroad repair shops remained behind schedule, in some cases to a considerable degree.
